Release Notes

April & May 2015 Feature Release

New Features

Webex Training Center Integration

In this release we have introduced integration with Webex Training Center product based on customer requests. With this integration, customers will be able to setup and have virtual instructor led training events using Webex Training center. Note that this feature will be enabled fully by Jun5 th.

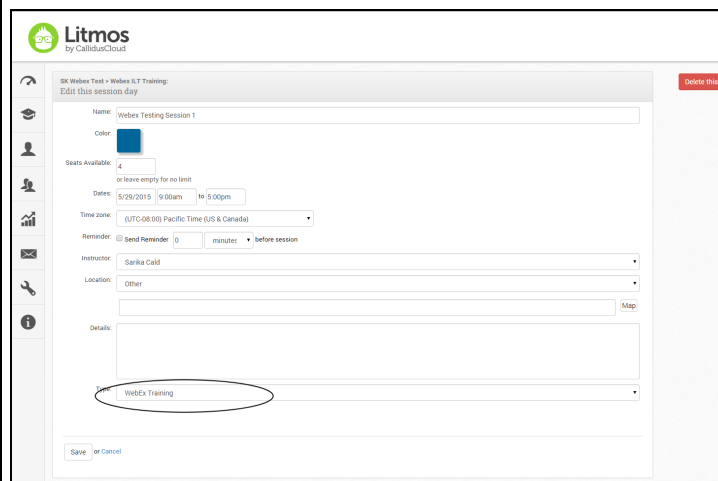

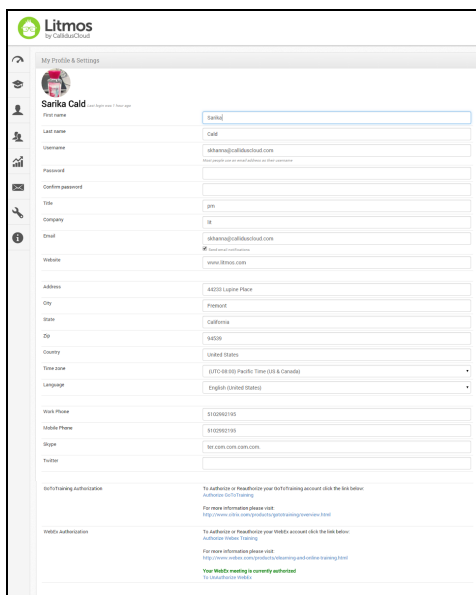

About Webex Training Center

WebEx Training Center is specifically designed to help make your educational programs more effective. Instructors will appreciate all of the tools they have at their disposal to make all types of training more interesting. Just a short list a features includes: real-time polling, virtual breakout rooms, hands-on labs, quizzes, threaded Q&As, and attention monitoring tools.

Litmos Setup

Setting up integration with Webex Training Center is as follows

1. **Enable Integration** from Accounts > Integrations tab
2. Authenticate webex Account for Instructors in each instructor's profile setup
3. When creating an ILT session, select Webex Training from Type dropdown.

Enhanced Module Content Conversion to HTML

In this release, we've enhanced our conversion process to convert PDF and Office documents to HTML. With this our customers will experience -

- Enhanced quality of converted ppt, pptx, pdf and docx documents that looks beautiful on any device
- Support for uploading of office documents in addition to existing file types

Wordpress & Drupal Plugins

This release of Litmos adds two more out of box integrations to our growing set of integrations. These are much requested Drupal and Wordpress plugins.

These plugins allows Litmos administrators to embed lists of Litmos courses and allow learners to access Litmos courses directly from a Drupal website.

The screenshot displays two plugin descriptions on the Litmos website. The first is for the Drupal plugin, which allows administrators to embed lists of Litmos courses on a Drupal website. The second is for the Wordpress plugin, which allows administrators to embed lists of Litmos courses on a Wordpress website.

Plugin	Description
Drupal	The Litmos plugin for Drupal allows Litmos administrators to embed lists of Litmos courses and allow learners to access Litmos courses directly from a Drupal website.
Wordpress	The Litmos plugin for Wordpress allows Litmos administrators to embed lists of Litmos courses and allow learners to access Litmos courses directly from a Wordpress website.

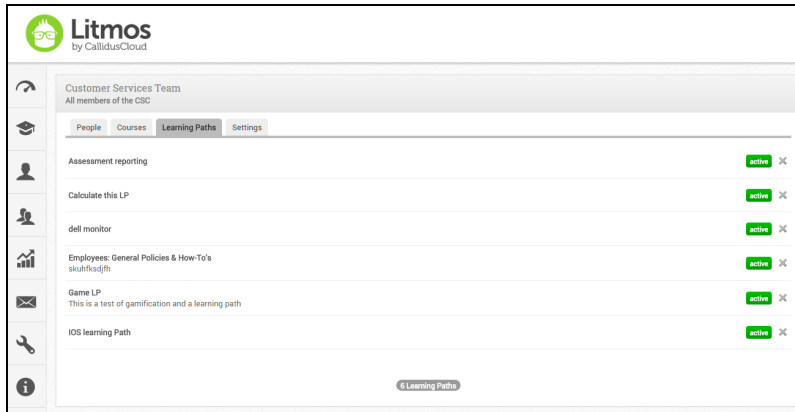

Learning Path Enhancements

A Learning Path tab has been added to person detail and team detail so admins can easily view and manage learning paths assigned to individuals and teams.

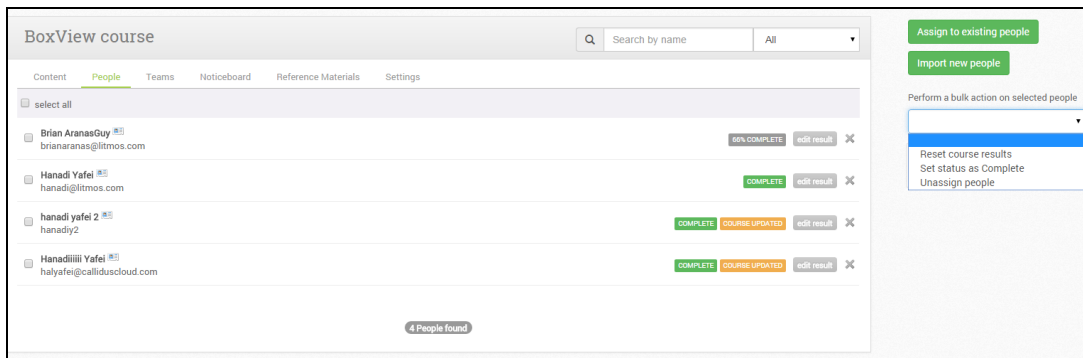

The screenshot shows a user profile for Madeline Homig in the Litmos system. The 'Learning Path' tab is selected, displaying a list of learning paths assigned to the user. Each path has a status indicator (e.g., 'UNCOMPLETED') and a close button (X).

Learning Path	Status
09282014 LP1	UNCOMPLETED
All New LP-C2M3	UNCOMPLETED
Break Learning Path or not	UNCOMPLETED
Calc My %	UNCOMPLETED
Calculate this LP	UNCOMPLETED
Can Dan Break the Learning Paths :)	UNCOMPLETED
Fresh LP	UNCOMPLETED
Game LP	UNCOMPLETED
qualification by test	UNCOMPLETED
Intermediate Level in Litmos	UNCOMPLETED
Kate's Learning Path	UNCOMPLETED
Kyle 3rd learning path	UNCOMPLETED

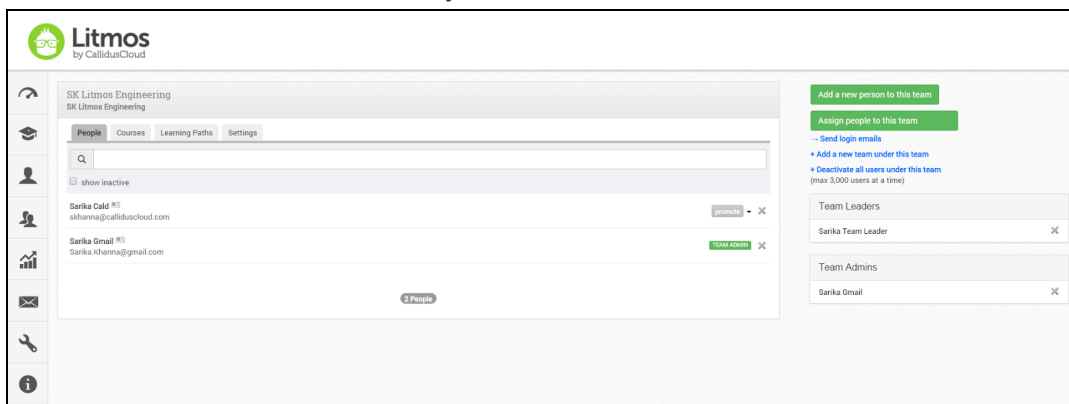

Bulk User Administration

- Bulk Unassign users from course - With this feature, admins can manage course registrations to a course. This will help solve those sticky situations when you accidentally assign a course to the entire user base and wish to revert it back.

- Bulk Deactivation - With this feature you can start a process to deactivate all team members in a team by one click. Please be very sure that this is what you want as this could deactivate a bulk of your users.

- Bulk Import - We've improved our bulk import via csv to include an option to activate or inactivate users via the import.

SSO Integration with Calliduscloud Lead to Money Suite

In this release, we've productized single sign on integration with the our parent company's Calliduscloud Lead to Money Suite. If you are a multi product customer of Calliduscloud, your users can seamlessly navigate across all Calliduscloud solutions including Litmos.
