

Industry: Government
Use Case: Employee Training

TDOT provides **life-saving safety training** to their employees using **SAP Litmos**

The Tennessee Department of Transportation (TDOT) is a multimodal agency that manages statewide infrastructure, including roadways, aviation, public transit, waterways, and railroads. The mission of TDOT is to provide a safe and reliable transportation system for people, goods, and services that support economic prosperity in Tennessee.

With nearly 4,000 total employees, a portion of whom work directly on the roadways and other infrastructure, TDOT has the very serious responsibility of protecting those workers, as well as educating all staff on the latest safety protocols and procedures. They rely on SAP Litmos to power their learning program because it enables them to deliver continuous learning that's relevant, timely, and trackable.

TDOT now relies on Litmos to ensure their employees are safe on the job and to enhance the overall engagement of their staff.

The tracking functionality of **Litmos is so powerful and in this modern environment**, what we really want to do is use Litmos to empower these employees to access the training they need in an easy way,"

Avery Poor,
HR Business Partner, TDOT
